Mark Rofail

London, UK markm.rofail@gmail.com linkedin/markmrofail github/markrofail

Professional Summary

Senior full-stack engineer with 6+ years building high-scale products in streaming, banking, and payments, from resilient backend services to polished React experiences. I unblock teams, improve reliability through chaos and load testing, and ship products that reduce fraud and drive measurable impact.

Experience

Stripe
SWE, Payouts Surfaces
March 2026 – Present | London, UK

- As Reliability Lead for Payouts Surfaces, cut post-deployment incidents by 35% with standardized pre-launch checks and reduced MTTA by 60% through synthetic monitoring.
- Integrated 6 payment rails (Apple Pay, Google Pay, Crypto, ACH, RTP, SEPA) into global payouts, unlocking $150M in new processing volume through localized and instant settlement.
- Led a zero-downtime migration of 50M+ ledger records from a legacy datastore to PostgreSQL with strict transactional guarantees, eliminating major technical debt.

Amazon
SWE, Prime Video Web
November 2022 – March 2026 | London, UK

- Drove the roadmap for the high-volume Prime Video detail page redesign, turning requirements into a plan for 4 engineers and lifting user satisfaction by 21%.
- Built a developer productivity suite of debugging extensions and API-linked UI inspectors, cutting front-end investigation time by 40% and speeding team delivery.
- Led the primevideo.com Ads integration across 50+ microservices via feature-flag-driven releases, boosting ad engagement by 15% while tightly controlling risk.
- Architected a multi-region chaos testing framework for Prime Video's critical path, resolving systemic memory leaks and improving distributed system stability by 30%.

GoCardless
SWE, Payments Intelligence
October 2021 – October 2022 | London, UK

Shahry
Software Development Engineer
July 2020 – September 2021 | Cairo, EG

Informatica Middle East
Software Development Engineer
June 2019 – June 2020 | Alexandria, EG

Skills

Programming	Python, Ruby, TypeScript, Java
Frameworks	Django, FastAPI, Rails, React
Testing	Jest, pytest, Load, Chaos Testing
Database	Redis, DynamoDB, PostgreSQL
DevOps	CloudFormation, CI/CD, Prometheus

Projects & Publications

ICVES Publication
Multi-Modal Vehicle Attack Detection
Technologies: TensorFlow, Python

- Simulated attacks by manipulating the vehicle's camera feed.
- Built a multimodal module detecting discrepancies between image and LiDAR sensors.

Google Summer of Code
PostgreSQL Core Contributor
Technologies: C, C++

- Cut index scan time from 25ms to 2ms by implementing GIN index scans for polymorphic array types.

Education

BSc. Computer Science
German University in Cairo
September 2014 – June 2019 | Cairo, EG
GPA: 3.9 / 4.0 | Highest Honors

Leadership & Awards

Coding Workshops - 2022
Started and led biweekly workshops that accelerated ramp-up for 15+ new hires and junior engineers.

GSoC Mentor - 2021
Mentored a student throughout their PostgreSQL project.

Bachelor Project Supervisor - 2021
Supervised three undergraduate projects.

ICVES Best Paper Award - 2019
Best paper among 54 submissions.
